

ALL PICTURES PROVIDED BY RTINGS				THIS IS A COPING POST.. because I chose TN over OLED.				IF YOU'RE ON CONTROLLER THIS PANEL IS PROBABLY OK... UNLESS IF YOU'RE A ROLLER GOD			
<div>COMPARING TO MY XL2566X+ I STRUGGLE TO AIM WITH THIS PANEL</div>  <div>I USED THE XG2431 SENSE JAN. 12, 2022. (3 YEARS)</div>				<div>INPUT LATENCY SUCKS ON IPS PANELS INCLUDING THIS ONE...</div>  <div>COLORS ARE GOOD ENOUGH FOR CASUAL GAMING</div>				<div>YES I WATCHED "BIJAN JAMSHIDI" VIDEO</div>  <div>XL2566X+ LOOKS LESS CLEAR IN MOTION WHEN MY XG2431 IS ON AND ACTIVE... THERE'S SOMETHING STRANGE HAPPENING HERE.. PROBABLY A FAULT WITH HOW WINDOWS OR MY AMD GPU HANDLES MULTIPLE DISPLAYS.</div> <div>GPU: RX 6800 XT</div>			
 <div>XG2431 ~ BFI_ON (LIGHT) @ 240hz BRIGHTNESS GOOD (INPUT LATENCY PUTS THE USER AT A DISADVANTAGE)</div>				 <div>XG2431 ~ BFI_ON (NORMAL) @ 240hz BRIGHTNESS SOMETIMES TO DARK (INPUT LATENCY PUTS THE USER AT A DISADVANTAGE STILL)</div> <div>AVOID IPS (my personal advice)</div>				 <div>XG2431 ~ BFI_ON (EXTREME) @ 240hz BRIGHTNESS AWFUL (INPUT LATENCY PUTS THE USER AT A DISADVANTAGE STILL!)</div> <div>EVEN THOUGH I DO BELIEVE "BIJAN JAMSHIDI" HAS THE END USER BEST INTEREST AT HEART I DON'T TRUST HIS FINDINGS.</div>			
HIGHER THAN 240hz STILL FEELS SNAPPY THAN LOCKED 240hz..				IF I OWNED THIS PANEL I'D BE USING THIS MODE. IT'S STILL NOT COMPETITIVE WITH A CRT SO I COULDN'T JUSTIFY IT.				DON'T GET ME WRONG.. I'M SURE THIS MOTION LOOKS GOOD IN PERSON BUT IT STILL DOESN'T BEAT TNs WITH PROPER HIGH BRIGHT BFI			
<div>COLORS AND CONTRAST ARE AMAZING</div>  <div>CANNOT READ RTINGS</div>				<div>ZERO PIXEL GHOSTING ON OLED</div>  <div>EXCELLENT INPUT LATENCY</div> <div>CANNOT READ RTINGS STILL</div>				 <div>BLUUUUUUURREEE</div>			
 <div>PG27AQDP ~ BFI_OFF @ 480hz BRIGHTNESS GOOD. PICTURE CLEAR FOR FPS BUT HITTING THIS FRAME RATE IS CONSISTENTLY HARD DEPENDING ON GAME. ZERO CROSSTALK OR PIXEL GHOSTING. (EXCELLENT INPUT LATENCY)</div> <div>SAMPLE AND HOLD IS KILLING MOTION CLARITY</div>				 <div>PG27AQDP ~ BFI_ON @ 240hz BRIGHTNESS SOMETIMES TO DARK. MOTION CLARITY IMPROVED OVER BFI_OFF @ 240hz. 240 FPS IS AN EASIER TARGET TO HIT CONSISTENTLY @ 1440p. (INPUT LATENCY SHOULD BE EXCELLENT STILL)</div> <div>NOT MUCH IMPROVEMENT</div>				 <div>PG27AQDP ~ BFI_ON @ 120hz BRIGHTNESS SOMETIMES TO DARK. MOTION CLARITY IS IMPROVED OVER BFI_OFF @ 120hz. IMO AS LONG AS BRIGHTNESS ISN'T BAD BFI IS A MUST HERE. (EXCELLENT INPUT LATENCY)</div> <div>GOING TO HAVE TO STOP TO READ THIS...</div>			
HORIZONTAL VIEWING IS TERRIBLE.. MY WIFE COMPLAINED WATCHING ME PLAY A GAME.				I OWN THE XL2566X+ (400hz DYAC 2 Premium   AMA Premium)				NOT SAYING CROSSTALK CANNOT BE SPOTTED BUT DURING INTENSE TRACKING FIGHTS YOU WILL NOT BE FOCUSED ON IT..			
<div>ADVANTAGE TO BOOST INDIVIDUAL COLORS IS AN INCREDIBLE FEATURE</div>  <div>DYAC 2 DOESN'T MAKE ME MOTION SICK</div> <div>I CAN MAKE THIS RED MORE INTENSE WITHOUT AFFECTING OTHER COLORS</div>				<div>THE VIEW/SONIC HAS BETTER COLORS STILL</div>  <div>COLORS ARE ACTUALLY NOT BAD EVEN STILL.. YOU JUST ADJUST TO THEM</div> <div>PAY ATTENTION TO BOXES AND NUMBERS</div>				<div>THIS CROSSTALK IS HARD TO SEE IN PERSON</div>  <div>BRIGHTNESS DOES NOT WORSEN OVER BFI_OFF..</div> <div>THE ASUS 540hz SHOULD BE GOOD AS WELL I JUST PERSONALLY PREFER ZOWIE'S COLOR CONTROL</div>			
 <div>XL2586X ~ BFI_ON @ 540hz BRIGHTNESS GREAT. MOTION CLEAR. MINIMAL CROSSTALK AND PIXEL GHOSTING PRESENT. HARD TO HIT FPS TARGET @ 1080p WITH MAX SHARPNESS (EXCELLENT INPUT LATENCY)</div> <div>COLORS ARE OK.. BUT NOT GREAT OFC</div>				 <div>XL2586X ~ BFI_ON @ 240hz BRIGHTNESS GREAT. MOTION CLEAR. CROSSTALK AND PIXEL GHOSTING PRESENT BUT IN PRACTICE HARD TO VISUALLY SEE UNLESS ON AN OPAQUE BACKGROUND. EASIER TO HIT FPS TARGET @ 1080p WITH MAX SHARPNESS (EXCELLENT INPUT LATENCY)</div> <div>TNs ARE EASY ON THE EYES</div>				 <div>XL2586X ~ BFI_ON @ 120hz BRIGHTNESS GREAT. MOTION CLEAR. CROSSTALK AND PIXEL GHOSTING PRESENT BUT IN PRACTICE HARD TO VISUALLY SEE UNLESS ON AN OPAQUE BACKGROUND. VERY EASY TO HIT FPS TARGET @ 1080p WITH MAX SHARPNESS (EXCELLENT INPUT LATENCY)</div> <div>BFI IS AMAZING</div>
